Solution Details

1004: Visio Text Not Printing

Classification: End User Issue \ Software
Status: ACTIVE
Self-Service Access?: YES

Symptom:

The text within my drawing does not print.

Cause:

You may have an unsupported printer driver

Resolution:

Try setting a printer preference that will allow you to print text. On the File menu, click Print. In the Print dialog box, click Properties and select the option that lets you print text as graphics. Not all printer drivers have the text as graphic feature.
