IFS EXPRESS ERP SOLUTION OFFERS FASTER ROI AND LOWER TOTAL COST OF OWNERSHIP

IFS is one of the world's leading providers of component-based business software developed using open standards. With its expertise in the mid-market, IFS has since 1983 been a provider of business applications focused on meeting the needs of selected industries. Today, IFS operates in two areas: lifecycle management, where asset and product lifecycle management are critical issues, and extended ERP, including supply chain management (SCM); enterprise asset management (EAM); service management; customer relationship management (CRM); and corporate performance management (CPM) capabilities.

IFS is a Premier IBM Business Partner and a member of several PartnerWorld Industry Networks (PWINs), including automotive, fabrication and assembly and life sciences.

SOLUTION OVERVIEW.

IFS Express packaged solutions enable mid-market companies to deploy IFS Applications™ business software at a fraction of the cost of most enterprise software implementations.

IFS Applications™ helps companies improve efficiency, cut costs, react swiftly to market conditions, and take advantage of new business opportunities. It is the only true component-based business solution on the market, enabling companies to deploy an enterprise system step by step, as their needs and budget dictate. Based on open standards, IFS Applications makes it easier to stay up-to-date with technology and to integrate with legacy systems. And only IFS offers total lifecycle management, enabling companies to maximize profitability over the lifecycles of their products, customers, and assets.

IBM Built On Express components:

- IBM Express servers (xSeries, pSeries, BladeCenter)
- IBM WebSphere Application Server - Express

PROVEN CLIENT SUCCESS.

IFS Applications provided Data I/O, located in Redmond, WA, with an enterprise system that could be implemented quickly and economically, would deliver rapid ROI, and would fully integrate with their global operations. Data I/O is a leading provider of semiconductor device programming systems.

"We were looking for a fully integrated system that could be implemented quickly and economically, would deliver rapid ROI, and would be fully integrated with our global operations," said Joel Hatlen, Chief Financial Officer at Data I/O. "Our major customers...require global support in multiple time zones." This solution...enables us to deploy our new system in the least amount of time, with all the functionality we need, and with minimal disruption to our operations..."
