

## Cerner Services

---

### Highlights

---

- ***Realizing value from critical, yet complex core technologies. Open Clinical Foundation (Clinical Data Repository), Discern (Clinical Decision Support System) and knowledge Index (Controlled Medical Vocabulary).***
- ***Complementing Accelerated Implementation. Cerner provides tools and methodologies to assist in accelerated system design and build of Millennium solutions. IBM has aligned methodologies to ensure that acceleration occurs and achieves desired business goals.***
- ***Helping cross the Classic-Millennium Chasm. Many organizations are still taking advantage of products from Cerner's Classic product line. Healthlink has the application expertise to help these customers both implement these systems and transition to the Millennium architecture.***
- ***Departmental/Ancillary Systems. Cerner's strong departmental and ancillary systems offer tremendous potential to improve service efficiency and clinical quality. IBM is knowledgeable in both the technical and operational areas required to realize this potential.***

There is no substitute for understanding a system's technical details, capabilities or limitations. We are experienced in Cerner products and can provide the appropriate checks to ensure your implementation meets organizational goals. Our teams are composed of staff that have previously worked for Cerner and/or worked many years at various Cerner clients.

#### The Cerner Vision

Cerner is committed to delivering their vision of a continuum of care fully integrated by information technology. IBM Healthlink Solutions supports Cerner's vision and knows that effectively integrating technology demands a detailed focus on operations and process.

#### Our Approach

While Cerner works to design the technology that will meet your needs, we will work to enable your organization can achieve a successful implementation. Cerner's information systems are among the most powerful in the industry and present organizations with numerous options for system design. We have

proven capabilities in helping organizations build their own technology enabled model of care. IBM Healthlink Solutions helps organizations navigate the complex technology and business issues that can impede a Cerner implementation.

#### Our Team

Our depth of expertise and knowledge can easily support the implementation and management of Cerner's suite of applications and modules. As a part of our services our consultants can provide support and guidance with project management, communication and change management, organizational readiness assessments, pre-implementation planning, workflow analysis, design, build, system testing and staff training. Our consultant's expertise is strengthened by their focus on process redesign initiatives so that we can assist clients in customizing the Cerner applications to enable them to reach their vision, streamline processes, and improve organizational efficiency.
