

# IBM developerWorks: the technical resource of choice for millions

## Learn • Connect • Share

### IBM developerWorks is...

- An industry award-winning technical Website
- A source for technical content, code and community resources
- Relied on by more than 6 million users
- Available in English, Chinese, Japanese, Russian and Korean

IBM developerWorks® provides content, code and community resources to help you solve technical challenges, build skills, and share knowledge. Novices and experts welcomed!

### Content

**The depth and breadth of technical content is unparalleled.**

- Hone your skills with demos, Webcasts, solution roadmaps, and over 2,200 tutorials
- Read articles and integration case studies from IT projects underway or already implemented at IBM
- Evaluate open source and open standards technologies like Ajax and Web 2.0 tools
- Hands-on technical briefings and seminars in cities around the world

## Community

Choose from a variety of community-based features to get the answers you need to succeed.

- Collaborate in community forums with experts and peers worldwide
- Build relationships with practitioners, experts, and business partners by joining a group or expert space
- Search blogs to find reviews and expert opinions on new products and industry trends
- Listen to developerWorks podcasts to hear the latest technical trends from industry luminaries and IBM thought leaders
