

Rational software

ibm.com/training/au/rational

Curriculum Overview

IBM Rational software helps organizations automate, integrate, and govern the core business process of software and systems delivery via the IBM Rational Software Delivery Platform. Offering an array of products, services, and best practices, this open, modular, and proven solution spans the entire software and systems delivery lifecycle.

The Rational training portfolio is designed to help meet your skill building needs in the four lifecycle categories of Architecture Management, Change and Release Management, Process and Portfolio Management, and Quality Management.

Architecture Management

Architecture management is a discipline, which focuses on governing changes with software architecture and ensuring architectural integrity and alignment with current requirements and implementations. Our curriculum provides skills with industry-leading architecture management tools for architecture and design modelling, model-driven development, component testing, static and runtime analysis activities.

Change and Release Management

Software development is an increasingly complex and dynamic activity. Development frequently occurs in teams that perform parallel development on the same application, often in geographically distributed locations. Our curriculum helps software and systems development teams empower the business by accelerating software delivery, making global teams more efficient, and governing end-to-end software processes.

Process and Portfolio Management

Process and portfolio managers need to prioritize investments across projects and accurately scope, estimate, schedule and manage resources. IBM Rational delivers with tools to manage the IT project portfolio lifecycle, reusable processes to manage project work, application lifecycle management solutions to bridge development and operations, and proven expertise in facilitating the organisational transformation that is essential to aligning IT with business objectives. Our curriculum helps customers by training them on the proper use of proven tools and practices.

Quality Management

Quality is the subjective impression felt by end users about how well an application addresses their needs. IBM Rational toolset provides guidance, best practices and integrated tools, which supports a broad range of heterogeneous applications to help organizations achieve improvements in cost efficiency, quality metrics and time-to-value for business-critical projects. Our curriculum empowers teams to build quality into their products, using automation capabilities to accelerate discovery and diagnosis, ensuring clean communication between the business, development, quality assurance and IT operations.

In conclusion, there are many ways to learn concepts, develop skills, and gain the specialized knowledge needed to master the art of software and systems delivery via the IBM Rational Software Delivery Platform.

Rational Education Boot Camps

Save Up to 20% Over Individually-priced Courses

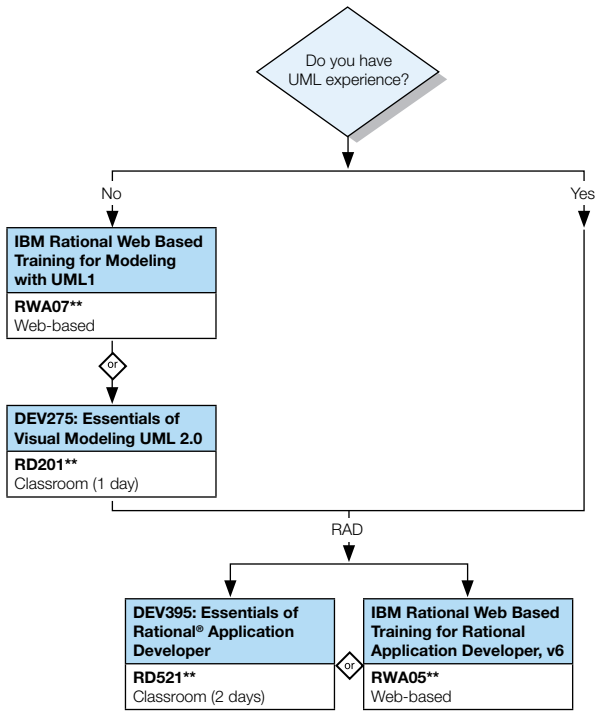

Acquire more Rational skills for less money. Rational Education boot camps are comprised of multiple courses and are priced to save you up to 20% off the cost of attending them separately. Plus, get 30 days of Web-based training for free.

Web-based Training (WBT) Now Hosted on IBM Learner Portal

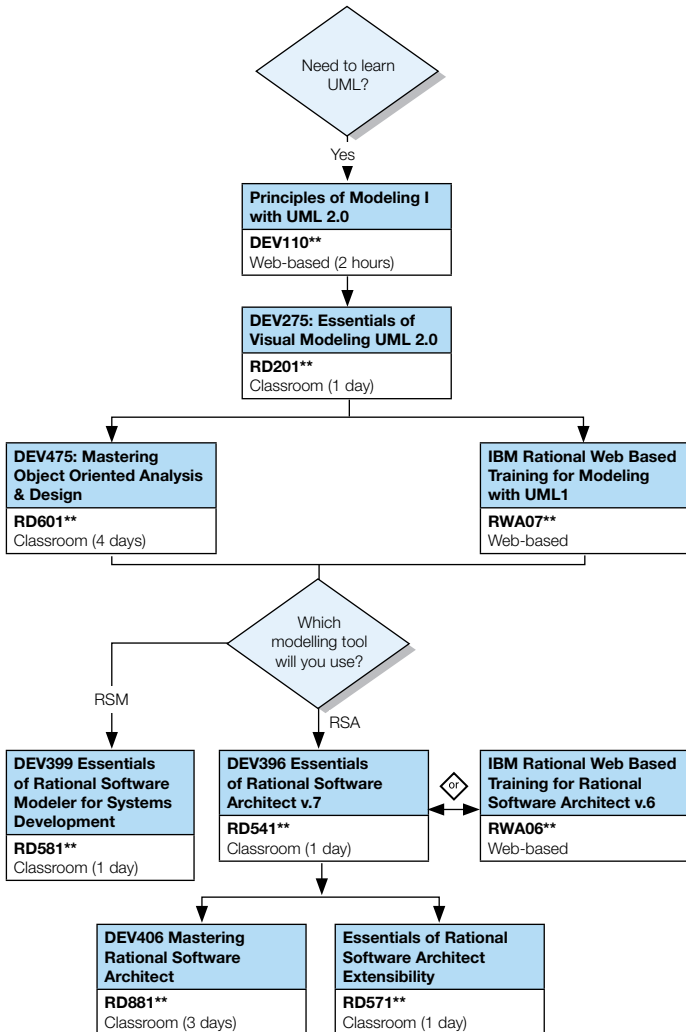

IBM Rational WBT is available through the IBM Learner Portal. This portal is an online Web-based, fully-managed, learning environment with content hosting services. It manages online course content, has user authentication and tracking/reporting, and is specifically designed to bring self-paced courses and information "front and center" for the student. All WBT are priced as a portfolio of courses for one year and are available across the lifecycle stages of Architecture Management, Process and Portfolio Management, Change and Release Management, and Quality Management.

IBM RATIONAL DESIGN AND CONSTRUCTION SKILLS ROADMAP

Enterprise Developer

UML Designer

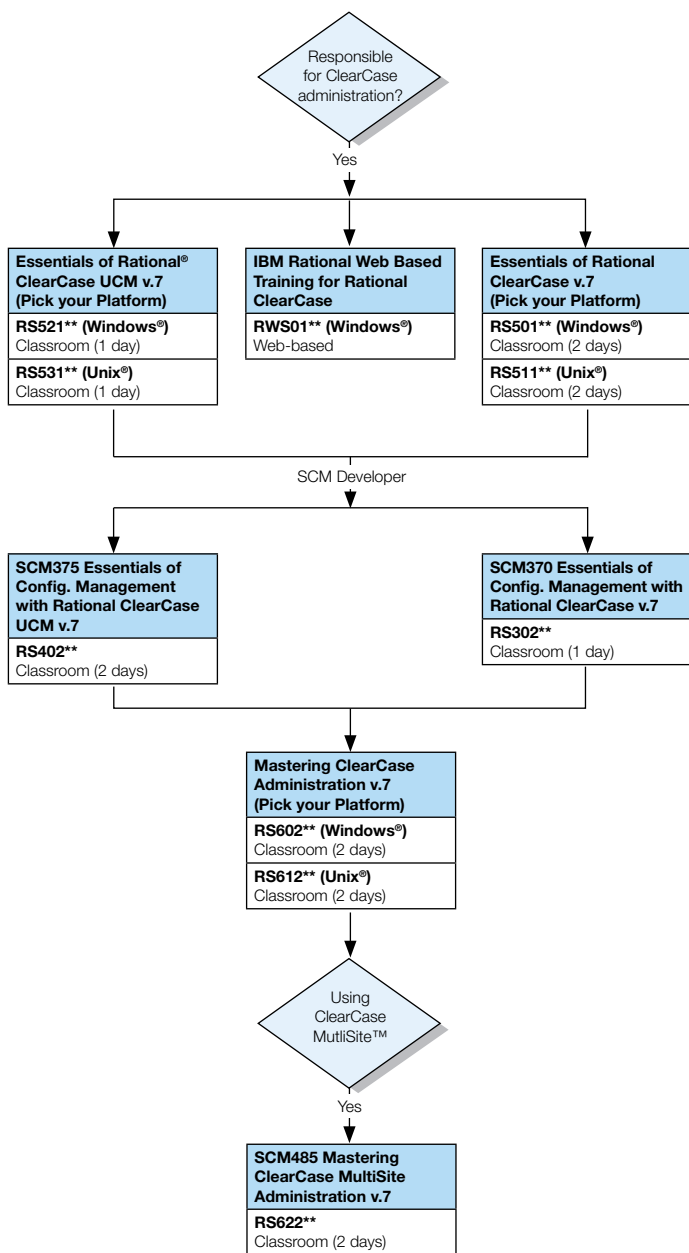

** Course delivered in AU=Australia & NZ=New Zealand

ClearQuest Administrator

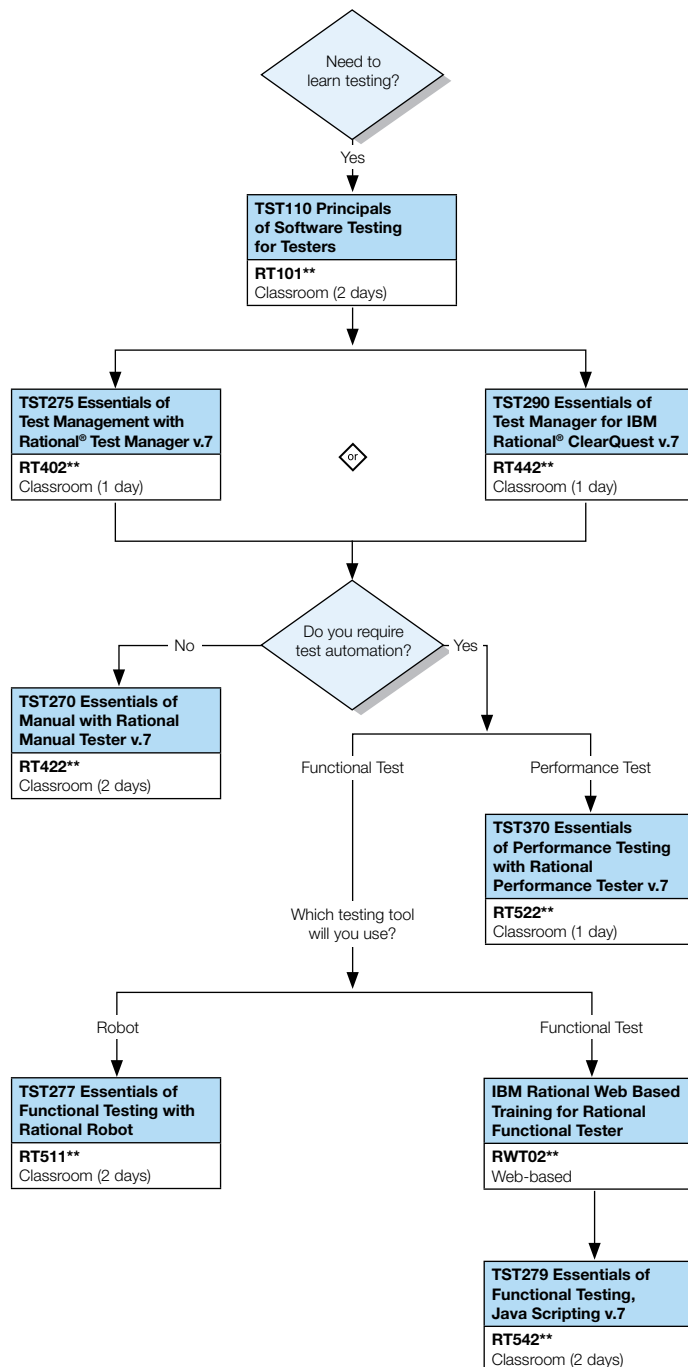

IBM RATIONAL SOFTWARE CONFIGURATION MANAGEMENT SKILLS ROADMAP

ClearCase Change Management – Developer & Administrator

IBM RATIONAL SOFTWARE QUALITY SKILLS ROADMAP

Tester

** Course delivered in AU=Australia & NZ=New Zealand
