Information

Target audience:

These workshops are designed for all IT professionals, including technical project managers, architects, systems programmers, systems designers and application developers who need to understand how to design and exploit the hardware and software infrastructure required to effectively run modern System z™ solutions. All workshops are open to Customers, Business Partners, Independent Software Vendors (ISVs) and IBMers.

These workshops are especially recommended if you plan to use the latest levels of technology that is available or recently announced.

Prerequisites:

These ITSO workshops are technical updates, so attendees should be familiar with the basic concepts and features of the subjects that are covered.

Schedule & Enrollment

These workshops will be delivered in multiple locations in all geographies between mid September through November, 2009.

To get information on the Italian workshop schedules: <http://www.ibm.com/training/it> or call 800 017001

Contacts:

For any questions or concerns, please call 800 017001

You can also receive information, when available, by registering for the ITSO Weekly Newsletter at: www.redbooks.ibm.com

Language:

The workshops will be conducted in English.

Instructors:

The workshops will be taught by IBM ITSO Poughkeepsie Project Leaders and WW experts.
