The IBM Cognos Financial Performance Management curriculum includes courses for IBM Cognos Controller 10.1. The following courses will help you quickly master the skills needed to productively work with your IBM Cognos software.

Click on the course codes to access a course description, view its schedule and enroll.

Job Role	Definition
Author	You build sophisticated reports for yourself and others. You are responsible for gathering report requirements, creating the reports and deploying them.
Application Developer	Using your experience with group accounting, you set up and maintain your company's consolidation structures. You define and modify necessary consolidation rules, structural definitions and maintain security definitions such as access rights and period locking. You work with currency conversion, intercompany transactions, and investments in subsidiaries, as well as define configuration settings.
Administrator	You manage the technical deployment of your company's applications, review hardware and software requirements, and plan and support the overall system infrastructure. You may install, configure, and optimize the system.
