

IBM Cognos TM1 Curriculum

To help businesses maximize their investment in this powerful application, the IBM Cognos Education team has worked closely with product development to create courses that are tailored to the needs of each type of user. The following courses have been designed to provide a fast, effective, and convenient way to maximize success with IBM Cognos TM1.

Click on the course codes to access a course description, view its schedule and enroll.

Job Role	Definition
Application Developer	Designs and builds multi-dimensional models, maps data flows, applies business logic, and executes loads from transactional systems. Also browse reports and cubes on an ad hoc basis.
Analyst	Manipulates business data to discover and understand trends and exceptions, and perform predictive analysis. May also create and customize predefined reports and templates for use by others.
Contributor	Views reports, presentations and dashboards, and may input data into templates.
Administrator	Manages the technical deployment of the company's applications, reviews hardware and software requirements, and plans the overall system infrastructure.
End User	Uses MS Excel or a web browser and needs to learn time-saving techniques that will help to quickly navigate to required information.
